

STRUCTURAL ENGINEERING EXPERT & BUILDING SAFETY AUTHORITY

GREG BATISTA, PE, CGC, SI

Licensed Professional Engineer · Certified General Contractor
· Licensed Special Inspector

President, G. Batista Engineering & Construction

Structural engineer with 35+ years of experience specializing in the rehabilitation and structural repair of existing buildings in Florida. One of very few experts who holds PE, CGC, and SI credentials simultaneously – uniquely qualified to speak to both the technical causes of existing building problems and the real-world realities of fixing them.

ENGINEER + GENERAL CONTRACTOR: A RARE AND LETHAL COMBINATION OF EXPERTISE

Experienced on-camera expert – repeatedly called upon by national and regional media to explain structural and general failures, building safety issues, and the challenges facing aging buildings.

AVAILABLE TO COMMENT ON

Structural & Safety Events

- Building collapses and structural failures
- Condo evacuations due to dangerous structural conditions
- Facade, balcony, and condominium structural failures
- Aging infrastructure and deferred maintenance risks
- Corrosion and concrete deterioration in South Florida
- Florida building inspection and recertification laws
- Structural technology and early detection systems
- When to repair vs. when to demolish – decision framework for owners
- Lessons learned from the Surfside collapse

Broader Building & Construction Topics

- Electrical, plumbing, and mechanical systems in aging buildings
- Full lifecycle of building repair – from diagnosis to completed construction
- What building owners need to know when something goes wrong
- Real-world cost and construction realities behind major building repairs
